EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. Michael W. Garvey on December 12, 2006. The application has been amended as follows:

Claims 26 – 27 have been cancelled. In addition, Claim 29 has also been cancelled.

Furthermore, Claim 7 has been amended as follows: in line 10, after "tubes", the following is inserted: -- wherein the first and second heated tubes are disposed so that the powdered material moves through the second tube in a direction generally opposite to a direction in which the powdered material moves through the first tube --.

Claims 7, 9 – 25 and 30 – 32 are allowed. The following is an examiner's statement of reasons for allowance: The closest prior art reference of Hay (U.S. 5,802,961) *fails to teach a powder pre-heating apparatus in which the powder moves in a direction in the second heated tube, opposite to the direction in which the powdered material moves through the first tube.* With regards to the reference of Hay, Hay teaches a first tube having an auger screw for moving powdered material through the first tube; means for heating the first tube such that the powdered material moving through the first tube is heated to a predetermined temperature without melting the

powdered material, the means for heating being coupled to an outer portion of the first heated tube; a hopper coupled to the first heated tube and staged for dispensing the heated powdered material; and having a second heated tube coupled to the first heated tube to facilitate recirculating the powdered material between the first and second heated tubes. The powder material leaving the second tube of Hay becomes recycled or recirculated through the system via inlet line 214; *however, the direction of movement of the powder in the second tube and first tube are the same.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The drawings filed on November 18, 2003 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
